

FAQs

What is penergetic t?

How does penergetic t work?

By using information that strengthens the immune system and improves digestion, penergetic t has a positive effect on the entire organism. This information stimulates the animal's organism and triggers necessary excretion processes.

What are the effects of penergetic t?

penergetic t is used as feed material, improving the quality of the animal produce. It helps to improve feed conversion, the immune system and the regenerative powers of the animals. Another benefit is an improved climate in the animal houses which results from positive changes in the excrement.

Where is penergetic t used?

It can be used for all animal species.

Where should penergetic t NOT be used?

In cases of viral diseases and if any symptoms occur that require veterinary attention.

Why is only such a small amount of the product required?

penergetic t works in a similar way to homeopathic products or vitamins. Minimal amounts are sufficient to stimulate biological processes.

Does penergetic t improve the climate in animal sheds?

A positive change in the excrement can improve the climate. However, this depends on the feed. To improve the result even further, we recommend also using penergetic g and AquaKat.

Is penergetic t a veterinary measure?

No, penergetic t cannot replace veterinary measures!

Is penergetic t in any way harmful to humans, animals or the environment?

penergetic t is completely harmless to humans, animals and the environment.

Carrier materials

Calcium Carbonate

Calcium Carbonate is a feed lime.

- Please see the safety data sheet (SDS) on Calcium Carbonate for more details.

Application of penergetic t

Can penergetic t always be added to the feed?

Yes. The product is used prophylactically.

- Please see the penergetic t application notes for more details.

How is penergetic t fed to the animals?

penergetic t can be mixed into the feed. Add the required amount into the mixer and mix it with the feed. It can also be mixed in with the mineral feed or added to the saltlicks. Or it can be mixed with water and poured over silage, hay, etc. Please ensure that no powder residues remain in the watering can or bucket.

What can the product be pre-mixed with?

With all feed ingredients.

Can penergetic t be fed with antibiotics?

Yes.

Is it possible to heat penergetic t?

Yes, this is possible. Pelletization does not reduce the effects.

Does penergetic t also have an effect on the slurry?

Yes! There is a large number of bacteria in the intestine. Digestive problems affect the slurry, and it cannot be optimally converted. If the excretions improve, the slurry will improve too.

What effects does penergetic t have on the grass on pastureland?

Cow pats cause meadows to become weedy. penergetic t makes the feces rot more quickly.

What happens if, for example, penergetic t for chickens is fed to pigs?

It will not yield any positive results; however, there is no risk for the animals.

Can other feed additives be used in addition to penergetic t?

It is possible to combine penergetic t with other products.

Dosage / time frame / duration

Dosages

It is not necessary to get the animals accustomed to the product by introducing small amounts first. The amounts of penergetic t should be increased slowly until the prescribed dosage is reached only in the case of dairy cattle because otherwise, the cell count will increase by too much (cleansing process). This should take place over a period of approximately 2 weeks.

- Please see the penergetic t application notes for more details.

Is penergetic t suitable for long-term use?

The products must be used in the long term, except for the specialized products penergetic t KD and penergetic t FD.

Is it possible to use too much penergetic t?

Yes. This would lead to diarrhea or an increase in the cell count of dairy cattle.

Product details

Which approvals have been granted?

Penergetic Int. AG is registered as a producer and distributor of feedstuffs with Agroscope ALP Posieux, the official feed control agency of the Swiss Federal Office for Agriculture. Registration number: CH 31744.

Penergetic Int. AG is also ISO 9001:2015 and Fami QS certified and registered with the following organizations: FIBL, InfoXgen, Bio Austria, IFOAM and OMRI.

What is the shelf life of penergetic t?

The powder lasts 5 years from the date of manufacture.

How should the product be stored?

Do not store the product on metal, but on a wooden surface. The containers must be stored in a dry environment and have to be tightly closed after use. Store the powder in a dry place. Store molasses in a dry and cool place (max. temperature 35° C).

Tips and tricks

How can the effects of penergetic t be enhanced?

- By vitalizing the drinking water with the AquaKat.
- In combination with other Penergetic products.

Specialized penergetic t products

penergetic t for chickens

- Improved feed conversion and more balanced growth.
- Please see the penergetic t application notes for more details.

penergetic t for laying hens

- Improved feed conversion and more stable eggs.
- Please see the penergetic t application notes for more details.

penergetic t for pig finishing

- Improved meat quality and weight gain.
- Please see the penergetic t application notes for more details.

penergetic t for ruminant finishing

- Improved meat quality and weight gain.
- Please see the penergetic t application notes for more details.

Penergetic t for calves KD

- Helps with bacterial diarrhea.
- Please see the penergetic t application notes for more details.

Penergetic t for piglets FD

- Helps with bacterial diarrhea.
- Please see the penergetic t application notes for more details.

Penergetic t for cows EP

- Higher milk yields for all milking animals (dairy cattle, sheep, goats).

Please see the penergetic t application notes for more details.

penergetic t for fish

- For fish farming, e.g. shrimp, catfish, seawater and freshwater fish.

Please see the penergetic t application notes for more details.

Are there any other specialized products?

We offer further specific penergetic t products, please ask for details.
