

Product:
Penergetic-k and Penergetic-t

User application Report

User:

Adviser:
K. Park

Date:
March to April 2003

Trial carried out using Penergetic-k and Penergetic-t at a poultry farm in Korea.

Numbers tested: Test group: 19,350 chickens
 Control group: 19,400 chickens

Feed:

Test group: Conventional fattening feed with 60g Penergetic-t per ton added
Control group: Conventional fattening feed

From day 3 to day 6, both groups were given the same feed without Penergetic-t.

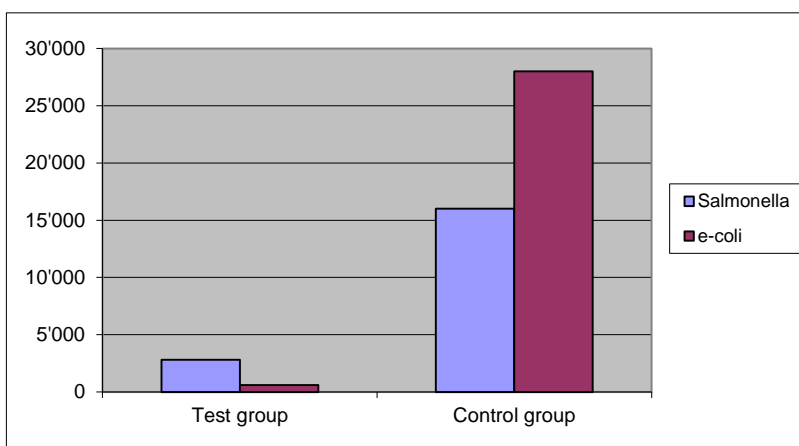

Bedding: Rice husks

Test group: Ground treated with Penergetic-k before chickens were housed.
Amount used: 7.74 kg

Results

	Numbers at start	Numbers after 31 days	Feed requirements / kg of meat	Weight in kg	Amount of feed used in kg
Control group 34 days	19,400	19,245	1.70	1.61	53,010
Test group 31 days	19,350	19,331	1.64	1.48	45,995

Results on bedding

Test group
Salmonella: 2,800
e-coli: 600

Control group
Salmonella: 16,000
e-coli: 28,000
